## Pet of the Week

**"GEORGE"**

If you are looking for a well mannered, kind hearted companion...look no further!! I am so gentle and eager to please. I love to sit close and cuddle, or just lay by your side and enjoy your company. I love go on walks or just soak up the sun in the yard. I still enjoy my stuffed animals but mostly I just want to hang out with you, Oh, did I mention I love children too!!!

Visit their web site at  
[www.spokanehumaneociety.org](http://www.spokanehumaneociety.org)  
to view other animals that need homes.

**6607 N. Havana | (509) 467-5235**

Open 7 days a week. Adoption fees for dogs are \$60 and \$74, depending on where you live and include licensing, vaccinations and spay or neuter.

**ARIES (March 21 to April 19)** A rejection of your attempt to be friendly leaves you with two choices: Try again, or give up. If you want to make another effort, go slowly. Let things develop without pressure.

**TAURUS (April 20 to May 20)** It could be a problem dealing with unfamiliar people who do things differently from what you're used to. But rely on that strong sense of purpose to get you through this difficult period.

**GEMINI (May 21 to June 20)** To avoid neglecting a personal matter because of a demanding new workplace schedule, start prioritizing immediately. Knowing how to apportion your time takes a little while to set up.

**CANCER (June 21 to July 22)** It won't be easy to avoid some of the pressures that come with change. Best advice: Take things a step at a time, and you'll be less likely to trip up while things are in a chaotic state.

**LEO (July 23 to August 22)** A much-talked-about workplace change could be coming soon. Be sure to get all the details involved in the process, and once you have them, you can decide how you want to deal with it.

**VIRGO (August 23 to September 22)** You might still believe that your trust was betrayed, although the facts would appear to prove the opposite. But by the week's end you should learn something that will help set the record straight.

**LIBRA (September 23 to October 22)** Holiday plans could be a challenge because of shifting circumstances. But a more settled period starts by midweek, allowing you to firm up your plan-making once and for all.

**SCORPIO (October 23 to November 21)** The facts continue to be on your side. So make use of them in dealing with any challenge to your stated position. Also, open your mind to the offer of help from an unlikely source.

**SAGITTARIUS (November 22 to December 21)** There could still be a communication problem holding up the resolution of a troublesome situation. Stay with it, and eventually your message will get through and be understood.

**CAPRICORN (December 22 to January 19)** A possible change in your workplace schedule might create a chaotic situation for a while. But once things begin to settle down, you might find that this could work to your advantage.

**AQUARIUS (January 20 to February 18)** A recent job-linked decision might need to be reassessed because of the possibility of finding benefits you might have overlooked. Check out all related data to help in the search.

**PISCES (February 19 to March 20)** A personal situation you agreed to might not be as acceptable to the other person involved in the matter. Avoid pressuring and bullying. Instead, seek common ground by talking things through.

**BORN THIS WEEK:** You have a gift for touching people's minds as well as their hearts. You would make an outstanding educator.

## MUST DO'S FOR STORING YOUR MOTOR HOME

### 1. Rodent Control

When your motorhome is stored for the winter it's not uncommon for mice and squirrels to make their winter home inside. These animals are notorious for chewing through vehicle wiring and plastic and rubber components, resulting in extensive damage to the motorhome. Start the engine periodically to keep any chewing squirrels out of the engine compartment area.

Possibly, the most important step is to try to prevent mice and other rodents from being able to access your motorhome. This can be difficult because mice can enter the RV through very small openings. Start by inspecting the underside of your motorhome for any gaps or holes. Fill these gaps using silicone or expanding foam.

A word of caution: If you never used expanding foam before, experiment with it on something other than your motorhome first. When it dries it can expand a great deal more than you expect.

Next, open drawers and cabinet doors inside your RV. Look in all of the corners and crevices, especially where plumbing and wiring enter the RV. If you can see any daylight, mice can get in. Fill these areas with silicone or foam.

Remove all food from the motorhome when it's being stored and thoroughly clean the RV to remove any remnants of food that might attract mice and other rodents. Some people say mothballs help deter mice from making their home in your RV, and others say an alternative to mothballs is dryer sheets, like Bounce. I have talked to people who swear they work and the smell is much more pleasant. If you are close to where your RV is being stored, you may want to use conventional mouse traps and check for mice every week or so.

### 2. Interior Preparation

Defrost the freezer compartment and clean the refrigerator. Leave the doors propped open and place baking soda in the compartments to absorb odors.

If the RV is in long-term storage and won't be plugged in to electricity, it's a good idea to turn off the main breaker in the distribution panel. Also, turn off the LP-gas supply valve at the LP tank.

Close the window blinds/shades to avoid sun exposure to the carpet, drapes and upholstery. Leave doors, drawers and cabinets open. Clean the A/C filter(s).

If you have vent covers installed on the overhead vents, which prevent rain from getting inside, leave the vents cracked open to allow for ventilation.

Remove any car battery terminals from devices like clocks, flashlights, etc. Remember to install them again next spring.

### 3. Exterior Preparation

When you store your motorhome outside for extended periods of time it begins to show signs of wear, caused by the constant exposure to the elements. Ozone in the air and ultraviolet (UV) rays from the sun start to take their toll. Ozone causes the paint to fade and makes rubber and vinyl dry out, crack and start to deteriorate. The UV rays make this aging process happen quicker.

Wash the exterior of the motorhome. Whenever I'm washing or cleaning anything, whether it's an automobile or the motorhome, I start from the top and work my way down. It's a good idea to clean the roof before storage, too. The type of roof your RV has will determine the cleaner you will need to use.

If you're really motivated, wash the exterior using a quality wax formulated for the type of exterior surface your motorhome has. A good coat of wax helps protect the finish the same as it does an automobile.

When cleaning the exterior, inspect all roof seams, body seams and window sealant for any cracks and openings that would allow water to get in. Consult your RV dealer for sealants compatible with these materials, and re-seal regularly. Don't forget to clean any awning fabrics, and let them dry completely before storing.

Ideally you should try to store your motorhome under a covered area and on a solid-surface like concrete. If this isn't possible, avoid parking under trees or in tall grass, fields or wooded areas.

If the motorhome won't be parked under some type of covered shelter, you may want to invest in a cover. Covering your RV can be a logical and cost-effective way to help protect your investment. If you decide to use a cover make sure it is made of a breathable material.

Service all locks with a spray lubricant and lubricate all hinges. Insects are attracted to the odorant added to LP gas. You may want to cover LP-gas appliances vents to prevent insects from making their winter home inside them. If you do cover the vents, remember to remove the covering next spring.
